## SparkFun Electronics reintroduces A111 Pulsed Radar Board

Just over one year ago American SparkFun Electronics launched a breakout board, the A111 Pulsed Radar Breakout, where they had integrated Acconeers sensor A111. The breakout board was primarily designed to interact with the Raspberry Pi. After a short time in retirement, the product is reintroduced through a so-called group campaign. This means that if enough people order the product before September 22, 2019, it will be produced and shipped by SparkFun.

For more information please have a look at SparkFuns website: <https://www.sparkfun.com/news/3084>.

Magnus Gerward, Business Development Director Acconeer, comments: "It's fun to see SparkFun reintroducing its breakout board with our sensor included. This is a great opportunity for those who missed out on buying when it was available earlier."

### About Acconeer AB

Acconeer is a leading radar sensor company based in Lund, south Sweden, in Ideon, the country's hottest region for wireless technologies. Acconeer is developing a truly leading ultra-low power, high precision 3D sensor which will revolutionize the way that mobile devices interpret their surroundings. Acconeers ultra-low power and millimeter precision sensor will be a robust and cost-effective solution for applications ranging from virtual reality and gaming to security and robot control. Information from the sensor can also be used to identify different materials, these are just some examples of the wide range of possibilities of application areas for the sensor. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye is the company's Certified Advisor (CA) and can be reached via telephone +46 (0)8 121 576 90 or via mail [certifiedadviser@redeye.se](mailto:certifiedadviser@redeye.se).
